**THE CENTER FOR SCIENCE AND MEDIA
PRESENTS**

SLOW JOURNALISM: A STORYTELLING RENAISSANCE FOR THE DIGITAL AGE

Presented by

DON BELT

Award-winning journalist and educator; writer and former senior editor of National Geographic.

**EVENT IS OPEN TO THE PUBLIC
Monday, March 6, 2017 | 10-11 a.m.**

Gold Auditorium, Donald P. Shiley BioScience Center

Don Belt, a long-time foreign correspondent and editor for National Geographic, describes his own awakening to the power of slow journalism, then takes the audience on a very long walk "Out of Eden" through the multimedia narratives of his colleague Paul Salopek, a two-time Pulitzer Prize winner and National Geographic Fellow.

For his history-making Out of Eden Walk, Salopek is walking 22,000 miles in the pathways of early human migration, from our origins in Ethiopia to the tip of South America. Along the way, he's using the latest advances in digital media to tell the timeless stories of the places and people he meets, creating a unique and moving record of the planet and its people, 2,500 generations after our ancestors walked out of Africa and began to explore the world.

Don and Paul--and San Diego State University--invite you to slow down, bask in the power of storytelling, and retrace our shared human journey. Free and open to the public.

The SDSU Center for Science and Media is a collaboration of the School of Journalism and Media Studies, the College of Professional Studies and Fine Arts, and the College of Sciences. The Center's primary mission is to educate the public about science, through the strategic and ethical use of media.

This lecture is open to the University community and the public free of charge.
