

Population in Perspective

How Will 7 Billion People Change Your Life?

In 2011, *National Geographic* magazine marked the world's seven-billionth person with a year long focus on population issues. How will our lives be affected and how can Americans engage with solutions to the challenge of sustaining a planet as the number climbs to 9 billion by 2050? Join our discussion featuring:

- **Rep. Betty McCollum**, Congresswoman, Minnesota's 4th District
- **Dennis Dimick**, Environment Editor for *National Geographic*
- **David Opp** teaches global economics and sustainable development in the MBA program at Saint Mary's University
- **Fred de Sam Lazaro**, correspondent for PBS NewsHour, and director of the Under-Told Stories Project at Saint Mary's University

Tuesday, March 13, 2012
