

In Class Practice Interview:

1. Do you have a hobby or something that you are passionate about?

"Singing. My favorite song is this R&B song called 'The End of Time.'"

2. What do you do for fun?

"I watch YouTube and make TikToks."

3. What is your favorite sport to play?

"Volleyball. I was playing volleyball a lot at middle school and now I'm on the team here. I don't know why I like it, but it is just fun, and I know how to play this sport really good."

4. What is your favorite movie or Netflix show?

"Sister, Sister."

5. What is your happiest memory and why?

"My happiest memory is 2019 Christmas. My whole family was together and was having a good time. We don't live that far away from each other but not close either. It was fun because everybody was there, and we were just missing one person."

6. What are you thinking about doing in the future?

"I'm thinking about becoming an engineer or an oncologist. I know that I want to go to school for it, and I already know that I'm not going to automatically become a doctor. I know to become a regular doctor is going to take work. I have to work my way up to it."

7. Why do you want to be a cancer doctor?

"I just feel the need to help people like them. They are going through a sickness, and I know they stay mostly in the hospital so sometimes they are not really able to do anything, so I want to help them beat cancer."
