"As schools and universities confront a worsening mental health crisis and an epidemic of mass shootings" - The Black Box

School shootings have been on the rise recently compared to the years prior. It has gotten back that many people feel unsafe leaving their kids at school.

"...at least 52 school districts in Texas have adopted Social Sentinel as an additional security measure since 2015, including Uvalde CISD where a gunman killed 19 children and two teachers in May." - Black Box

This reminds me of the shooting that happened in Texas. It was all over the news due to how many lives were lost.

"A rapid decrease in greenhouse gas emissions today would make a tremendous difference in the severity and frequency of climate catastrophes in the future" - Suing the World To Save It... (Might use)

"It's really, really frustrating. ... I have a whole lot of emotions about climate change. And you spend all this time and energy trying to get other people, especially our government, to work with us, and finding such resistance really exacerbates the emotional intensity of everything we feel about climate change, like that anxiety, that fear, the loss of freedom. It's so frustrating to have the government actively working against your best interests." - Suing the World To Save It... (Might use/Might shorten)
