Can babies wait

No they have come

To bring us joy each and everyone

Even though its war and sadness

The babies are blessings and bring gladness

I love you baby, We are glad you made it  
It was a long trip with lots of trials  
The nurse and doctor worked all night  
And here you are in the morning light

Buckle your seat there's someone on the way  
About to bring life and joy today  
Bring us together friend and enemy  
You have to stop the fighting do you hear me

It's too much killing  
So stop and come together God willing

Hugs and kisses to our new bundle of joy  
Each one reach one with our baby boy  
Right now our future is bright  
Even in Africa lets bring the light

Come to the hospital it's about the time

On the way is our little sunshine

No more war, stop fighting for oil, and things that take our joy

Gotta come together, I must implore

Oh, Africa, our land, our peace, to restore

Here comes baby  
Ready for the world and fun  
The war is still going on  
But the hope of new life is for everyone.

Dis is the time to stop and rewind

Reach for peace and be kind

Can't we stop because the baby is about to drop

Be united and build a better country

All to live in peace with money

Baby we love you

You are here and life begins brand new
