

WHAT IS GENITAL MUTILATIONS

It the partial or total removal of external female genitalia or other injury to the female genital organs for non-medical reasons. But why are we talking about this it because in Kenya and LDC we see this practice Female Genital Cutting and it actually does more harm them than helping them..

WHY?

The reason they do female Genital is quote on quote preparing them for there future husband but actually cause birth complication, infections, and probability of Death. At the same time if they don't do this they won't be able to marry someone else. Some people may argue its for the culture but it's still horrible on them than anyone else since in these countries they have no rights they get to do what ever they would want.

"STRIPED OUT OF THERE CHILDHOOD"

FGM IS A VIOLATION OF THE HUMAN RIGHTS OF GIRLS AND WOMEN.

WHY SHOULD WE CARE

This is important because young women are being forced to this because so and so there cultural but we need more attention on the matter because even though it may not be happening in your country it is happening around the world. Supposedly there doing this to prepare them for there husband but the damages of this may cause then not even to have babys.

ATTENTION

An estimated 68 million girls will be subjected to female genital mutilation by 2030 if we don't accelerate our efforts to end this harmful practice.If we coutine to put this aside these youg women may ruin there lives before they even start.

FGM does nothing but place women in jeopardy of their life. Cutting the female genitals has no health benefits and only cause "severe bleeding, problems urinating, infections, and childbirth problems." FGM is normally done for the "preservation of virginity, marriageability, and enhancement of male sexual pleasure."

FEMALE
GENITAL
MUTILATION

FGM IS A
VIOLATION OF
THE HUMAN
RIGHTS OF GIRLS
AND WOMEN!

PELUMI ATOMORI

What is FGM ?

Female genital mutilation (FGM) involves the partial or total removal of external female genitalia or other injury to the female genital organs for non-medical reasons. The practice has no health benefits for girls and women.

4 Main Stages of FGM

Believe in children
Funded by
Department
Local Government
NATIONAL FGM CENTRE
Developing excellence in response to FGM and

RISK

FGM has no health benefits and often leads to long-term physical and psychological consequences. Medical complications can include severe pain, prolonged bleeding, infection, infertility and even death. It can also lead to increased risk of HIV transmission.

This is cruel and unjustifiable. These women deserve better.

STOP FEMALE GENITAL MUTILATION

We need to stop this female genital mutilation. It's unsanitary, and it leads to little girls dying every year. A source says, that an estimated 68 million girls will be subjected to female genital mutilation by 2030. We need to stop this now.

FGM can cause serious health problems. FGM involves the partial or total removal of external female genitalia. This practice has ABSOLUTELY no health benefits for women and especially young girls.

Over 200 million girls have went through FGM. Mostly in Africa.

STOP FEMALE GENITAL MUTILATION

This is a violation of women's human rights. It needs to end.

Female Mutilation Needs To **STOP**

How is it affecting women?

These unsanitary procedures have caused many deaths, fistula, birth complications, trauma, and other medical problems

What is Happening?

Many women in places like Kenya are getting Mutilated without their permission in order for them to have a husband. They are blind folded and tied up during the unsanitary procedure. Covid-19 has caused these awful practices to continue and affect way more young girls because schools are closed and there is nothing to do.

What can be done?

This can be delayed by letting girls stay in school and getting the education they need.

People can also start movements to stop them and bring light to it to make it illegal.
