

NAME:

**Data Deepdive: Nigeria and the U.S.**

*This examination of data will help provide background information on the two countries we will be examining in this unit, Nigeria and the U.S.*

Go to the [CIA World Factbook](#) and select “Countries” and then the U.S. to start. After selecting the U.S., click on the “People and Society” section of the available data. Next, record the data below and then do the same for Nigeria.

| <i>Data</i>                                 | <i>The United States</i> | <i>Nigeria</i> |
|---|--------------------------|----------------|
| Maternal mortality rate                     |                          |                |
| Hospital bed density rate                   |                          |                |
| Physician density rate                      |                          |                |
| Infant mortality rate                       |                          |                |
| Life expectancy                             |                          |                |
| Drinking water source, improved, total      |                          |                |
| Sanitation facility access, improved, total |                          |                |
| Electricity access                          |                          |                |

Next, go to the [Human Development Index](#). Once there, select the U.S. and record the following. After completing the data for the U.S., please repeat for Nigeria.

| Data   | The United States | Nigeria |
|--|-------------------|---------|
| HDI Value and Classification                     |                   |         |
| A description of their HDI trends from 1990-2022 |                   |         |
| Comparison to the global HDI average             |                   |         |
