Social Media Post Analysis #2- Individual

Message: This image is explaining the type of medicine that the indigenous people use to get healthy and don't be sick of the throat, Colds and Fever or headaches

Purpose and Context: This picture is trying to make that people do this type of the indigenous people medicine and is giving us some recipes so that we can do it by ourselves

Speaker and Audience: Speaker: nativewysechoices or "indigenous people"
Audience: People that are sick and want some traditional medicine

Reflection: I think that this is effective because there are some recipes that our family use to do when they get sick and they get better "quickly"

Evaluation of Bias - group

The article:

The article talk about
how in tribes use the medicine
like something traditional.

The social media:

The social media talk about the
changes and the history of
medicine

Social Imperative - group

This is affecting to the society because is causing a lot of controversy with the people because a lot of people think that the traditional medicine is not working and they don't believe in it, but there is also people that believe in all of that different treatments and traditional medicines.
