We have a right to protest free from surveillance.

We should not be targeted or spied on — in college or anywhere else — for making our voices heard.

Tracked: How Colleges Use AI To Monitor Student Protests

Evaluation of Bias - group

The article:

Some people it's good some people think it's bad based on the article some people are using it for the wrong purpose even though social sentinel said it's not used for those purposes

The social media post:

That people are being watched through their devices even though they didn't get their consent to let them see their personal information there just doing whatever they like.

Social Imperative - group

People are using ai for the wrong seasons like monitoring teenagers privacy when they didn't get the person's consent

We should protect our first amendment right this day in time people aren't really respecting our privacy and freedom of speech
