The First Amendment and Artificial Intelligence: The Health of our Democracy

Performance Task Planning Template

**Your Group Claim:** The First Amendment is somewhat healthy in our digital world, because there are new and different rules that can give full freedom and our newest opinion that could be good or bad, but people can send/post whatever they want and some rules apply to now when could be bad/so we have to make sure we know our limits and not mix things up.

Evidence	Reasoning
<p>And at North Carolina A&amp;T, a campus official told a Social Sentinel employee to enter keywords to find posts related to a cheerleader's allegation that the school mishandled her rape complaint.</p>	<p>We choose this because it helps with our "but" because the Social Sentinel employee enters codes and keywords to find stuff related to the cheerleaders allegation that has mishandled her rape complaint.</p>
<p>At least 37 colleges, including four in North Texas, collectively educating hundreds of thousands of students, have used Social Sentinel since 2015.</p>	<p>We also choose this because at least 37 colleges or more, including four in North Texas, educating hundreds of thousands of students have used the same software since 2015, and we have to be</p>
<p>For public colleges, the use of the service sets up an additional conflict between protecting students' Constitutional rights of free speech and privacy and schools' duty to keep them safe on campus.</p>	<p>We choose this because for us on high school the conflict between protecting students free speech and privacy against the duty to protect students.</p>

be carefully using software that has been created a year

# The Safety of Social Sentinel

**Designing Your Project:**

1. How will you present your idea?

- Make a presentation
- Create a video
- Record a podcast
- Design an illustration
- other *Posted*

2. What materials do you need?

- Paper*
- Markers*
- Ruler*
- Wipe*
- 
- 

**Getting Started with your Project**

1. Create a draft or outline of your design

- a. Presentation Outline
- b. Video Outline
- c. Podcast Outline
- d. Illustration Outline

2. Gather any materials needed

3. Check the rubric for criteria

The First Amendment and Artificial Intelligence: The Health of our Democracy

Performance Task Planning Template

Your Group Claim: The first amendment is kinda healthy because you have freedom to post things, but AI is taking that freedom away because they are monitoring students' social media posts.

Evidence	Reasoning
<p>"Social Sentinel offered school across the country Sophi Striated technology to scan social media form student at risk or harming them, ads or others"</p> <p>"A social sentinel employee entered keywords into the company's monitoring tool to find posts related to the protest"</p>	<p>This evidence shows that student emails are being scanned and how AI is taking that freedom away.</p> <p>This evidence shows that students' privacy is being seen because of the user AI but it also good because student could speak out about what is going on.</p>
<p>"But emails in Golf between Campus police officials at Mennew State show the school used the service at least times that purpose."</p>	<p>This evidence shows that social monitor said they don't usually monitor student post out</p>

**Designing Your Project:**

1. How will you present your idea?

- Make a presentation (poster)
- Create a video
- Record a podcast
- Design an illustration
- other

2. What materials do you need?

- Markers
- poster
- images
- 
- 
- 

**Getting Started with your Project**

1. Create a draft or outline of your design

- a. Presentation Outline

### The First Amendment and Artificial Intelligence: The Health of our Democracy

#### Performance Task Planning Template

**Your Group Claim:** The First Amendment is kinda healthy in our digital world because you have the freedom to post anything on social media

Evidence	Reasoning
"Social Sentinel offered schools across the country sophisticated technology to scan social media post from students at risk of harming themselves or others."	This evidence shows that student emails are being scanned and how AI is taking that freedom away.
"A Social Sentinel employee entered keywords into the company's monitoring tool to find post related to the protest."	This evidence shows that students' private are being seen because of the use of AI but it also good because students could speak out about what is going on.
"But emails in gap between campus police officials at Kennesaw State show the school used the service at least three times for that purpose."	This show that social sentinel said they don't monitor school but university usually monitor student post a lot

The First Amendment and Artificial Intelligence: The Health of our Democracy

Performance Task Planning Template

Your Group Claim:

The First Amendment is somewhat healthy in our digital world because some things happen on the internet even though there is monitoring.

Evidence

"But even collecting publicly posted information may harm students' privacy and speech rights experts say."

Reasoning

This evidence shows that when someone posts something, it could harm their privacy and speech.

"Pyle was a 19-year old student at a nearby college. She told The News that she had no idea about KSU's monitoring."

This shows that some people don't even know about the KSU monitoring which is about public response.

"...job description outlining the daily duties of a criminal intelligence analyst, saying the role includes monitoring social sentiment for terms, civil unrest, protests" And more."

This evidence shows that the internet could protect some things that happen but not all because their could still be crimes that could happen or cyberbullying.

Your Group Claim:

The First Amendment is somewhat healthier in our digital world, because information is easier to spread yet easier to censor.

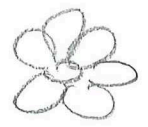

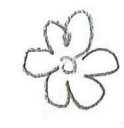

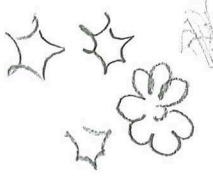

Evidence

The article itself

Reasoning

The article existing proves that information is more widely available.

<p>"The News examined thousands of emails, contracts, and marketing material from colleges around the country and spoke to school officials." "Despite publically saying its practice was not a surveillance tool..." (continued)</p>	<p>It is easier to find private information now that these programs exist.</p>
<p>"The document obtained by The News in response to a public records request, singled out one program's lead address - group, the lead's address network individuals."</p>	<p>Programs are being made to single out and track certain groups, proving that censorship is getting easier.</p>
