

Our Call to Action Question

Equality is a democratic value embedded in our founding documents. But we see inequity--racial, economic, social, and gender-based--in our communities, neighborhoods, and schools. ***In what ways can you be a defender of democracy by advocating for equality?***

- Where do you see evidence of unfairness or inequality?
- What is an issue that you care about personally and want to address?
- Are there individuals or groups who you think are not being given rights and privileges that others enjoy?
