

# PAIN

I am feel happy one minute hurting the next  
I feel pain in my neck and i feel like this  
Is such a drain it feels like broken glass in my veins

It Hurts so much i would rather die  
Every time i start to cry  
So many people in the US have it  
Not many people know about it

**Wrong**

**I thought about things going wrong wrong wrong**

**It never left my mind no no no**

**Can't stop thinking about it**

**No**

**The sickle cell is getting worse**

**MY ARMS My BACK MY LEGS**

**They hurt im tired tired it's getting worse**

# 27

27 27

My brother died at 27  
of sickle cell

It be feeling like the end of the world  
yeah it suck it suck

It hurt it hurt

You sit down and it feel like what's

The point of life it  
sad it sad like why

Now go now go Im back home home

But my brother died at 27

27 27

it just sad

\*mic drop\*

# SICK

If I were cured, the first thing I would do...

I don't know what I would do, spending my whole life  
sick, sick, with sickle

Chained by sickle, never free

Never a moment free for me.

# HOPE

Sitting around, looking for a strand of hope.  
Although it feels our brain is a float.  
Who knew my brother is a match.  
Not for the right sister that's the catch.  
Don't give up hope now.  
I'm in a clinical trial.  
Let's hope it cures me.  
because the days are getting blurry.  
I have not even thought of what to do when I'm free  
Cured of the burden of this disease.

# WORSE

The pain  
Oh it hurts  
My sickle cell is getting worse  
The pain  
In my mind in my brain  
My back, my arms, my whole body

**TAKE IT**

**I can't take it**

**His heart couldn't take it**

**It hurts all over**

**I was born with sickle cell**

**The pain**

**I CAN'T TAKE IT**

# The Results

She got her cells and she did her chemotherapy

She cant talk and she lost hair

People with sickle cell have been in pain and no one's aware

Your not feeling anything it's all mental

This girls journey is very inspirational

Long days in the hospital until results come in

Sickle cell in different families is incredibly common

Minutes and hours, days and nights

They wait for results to see what goes right
